Industrial Technology - Test & Measurement 2019 Year in Review

Executive Summary

Delancey Street Partners is pleased to present our Test & Measurement Sector Review for the year ended 2019. The Test & Measurement sector includes companies that offer i) analytical and testing instrumentation; ii) testing, inspection and certification (TIC) services; iii) electronics T&M; and iv) lab equipment and instruments. T&M instrumentation, technology and services are used across the life cycle of a product, from R&D to manufacturing to deployment, to ensure product performance and shorten time-to-market. In aggregate, the global T&M market exceeds \$100 billion. Companies in the sector benefit from an increasingly stringent and complex regulatory environment.

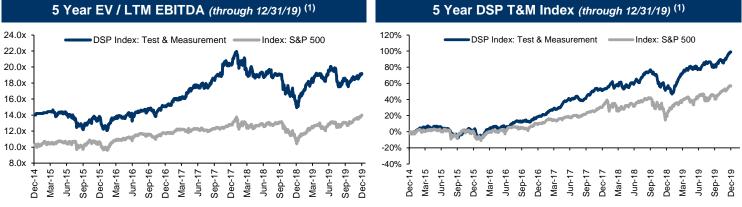

M&A activity in the T&M market is healthy. Strategic acquirors actively seek niche market leaders to complement organic growth initiatives. In addition, there are numerous private equity success stories. High barriers to entry, significant IP and technical expertise, strong margins and high public company valuations are all characteristics of the T&M sector.

Topics of Discussion

- 2019 review of public company stock performance
- YTD 2020 review of public company stock performance
- M&A review
- Sector commentary

Summary Review of Public Company Stock Performance

Test & Measurement stocks posted strong gains in 2019 with an average annual gain across sub-sectors of 33%, outperforming the S&P 500, continuing a trend of outperformance since 2016. Primary factors driving the strong performance of the sector include strong demand for products and services associated with new product development, continued margin improvements through operational efficiencies and a focus on high margin recurring revenue.

	2019 M&A and Strategic Commentary from Select T&M Executives
🔆 Agilent Technologies	"We spent around \$1.4bn on takeovers in 2019, snapping up BioTek and ACEA BioSciences to expand our cell analy capabilities. At close to \$1.2bn, BioTek was by far the bigger of the two takeovers, and the largest we have struck in rec years, but still came in just over the company's historical \$1bn ceiling on acquisitions. We're increasingly confident in our abilito take on larger-scale acquisitions and deliver on value creation and synergies." (Mike McMullen, CEO, 12/5/19)
VMETEK .	""We continued to strengthen our portfolio, deploying nearly \$1.1 billion in 2019 on the acquisitions of Gatan and PDT, a announcing a definitive agreement to divest our Reading Alloys business. Given our robust cash flows and financial strength, are well-positioned to continue investing in our growth initiatives and acquiring companies in attractive, niche markets to deli long-term, sustainable success for our shareholders." (David Zapico, Chairman & CEO, 1/5/20)
Amphenol	"We generated record operating and free cash flow of \$1.5 billion and \$1.2 billion respectively, both of which are excell confirmations of the Company's superior execution together with our disciplined working capital management. Our acquisit program created great value for the Company in 2019 with nine new companies added to the Amphenol family in the year. The acquisitions, which included SSI, Aorora, Kopec (Phonetic), Charles Industries, CONEC, Bernd Richter, GJM, Cablescan a finally XGiga expanded our position across a broad array of technologies and markets. Our ability to identify and execute up acquisitions and successfully bring these new companies into our family, remains a core competitive advantage for Company." (Adam Norwitt, CEO, 1/22/20)
🔆 eurofins	"In 2019, following two years of intense M&A activity in 2017 and 2018, the group moved into the final phase of its five y 2016-2020 plan to build a unique global network of state-of-the-art laboratories, market leadership positions, scale and scient excellence to offer even better, faster, more cost effective and innovative services to its clients. From a financial perspective, t translated into lower investments, in terms of both M&A and net capex, as well as continued improvement in the profitability businesses created or acquired before 2017, leading to improved free cash flow generation. For 2020, our objectives are achieve EUR 5bn of revenues, including 5% from organic growth and EUR 100m from acquisitions, EUR 1.1bn adjusted EBIT and EUR 500m free cash flow to the firm." (Gilles Martin, CEO, 3/4/20)
Honeywell	"We deployed \$7.8 billion of capital in 2019 across share repurchases, higher dividends, and high return capex in t acquisitions. We continue to have substantial balance sheet capacity to deploy in 2020 and beyond. We will aggressively purs M&A opportunities while being prudent with our shareowners' cash." (Darius Adamczyk, Chairman & CEO, 3/12/20)
METTLER TOLEDO	"We seek to pursue "bolt-on" acquisitions that may leverage our global sales and service network, respected brand, extens distribution channels, and technological leadership. We have identified life sciences, product inspection, and process analytics three key areas for acquisitions. While we believe our business is less susceptible to an economic downturn than in the past, don't believe we're immune to economic cycles. We will remain in the investment mode, but keep agile to adapt if mar conditions necessitate." (Shawn Vadala, CFO, 2/6/20)
Sensata Technologies	"As we look ahead to 2020, our strong base of new business wins will enable us to sustain the attractive end-market outgrout that we have generated over the past several years. We expect to maintain our industry-leading margin profile while continue to invest in attractive long-term growth opportunities, such as our Smart & Connected initiative for fleet management, where represents incremental content and a new potential customer base for Sensata." (Jeffrey Cote, President & CEO, 2/11/20)
SGS	"During 2019, we remain disciplined or focused on our capital allocation in line with our long-term objective. But during the ye we made 11 acquisitions in six business lines in order to strengthen our portfolio. The largest of those acquisitions is Ma Pointe, in the U.S., and together with LeanSis, which was the first acquisition we made in 2016, enhances our capability and strength in the operational consulting area and adds additional value to our customers, not just to CBE customers, but across board of our customer base." (Frankie Ng, CEO, 1/28/20)
TELEDYNE	"In 2019, we deployed \$484 million on complementary acquisitions within our environmental instrumentation and digital images businesses. Our strategy continues to emphasize growth in our core markets of instrumentation, digital imaging, aerospace a defense electronics and engineered systems. In 2020, we will remain focused on balanced and disciplined capital deploym among capital expenditures, product development, acquisitions and share repurchases." (Robert Mehrabian, Execut Chairman, 1/22/20)
Thermo Fisher s c i e n t i f i c	"We continued to successfully execute our capital deployment strategy during the year, completing \$1.8 billion of bolt acquisitions, returning \$1.8 billion of capital to shareholders through stock buybacks and dividends, and refinancing \$5.6 billior debt to generate \$80 million of savings annually." (Mark Casper, President & CEO, 1/30/20)

TEST & MEASUREMENT SECTOR REVIEW

YTD 2020 T&M Public Company Update

All global markets have been significantly impacted YTD 2020 due to COVID-19. The Test & Measurement Sector was no exception. After a strong 2019, T&M stocks have declined YTD 2020. As expected, many public companies are changing guidance or withdrawing forward guidance altogether. End market exposure plays a role in the severity of a stock decline. As an example, those companies with significant exposure to the energy industry are more exposed to downward stock price pressure. Summary year-to-date stock price changes by sub-sector (YTD as of 4/15/20):

•	Analytical Instrumentation:	mean down (23.0%) median down (21.9%)
•	Testing, Inspection & Certification (TIC):	mean down (36.5%) median down (29.5%)
•	Sensors & Controls / Electronics T&M:	mean down (19.7%) median down (14.3%)
•	Lab Equipment & Instruments:	mean down (5.5%) median down (5.5%)

Equity analysts at Bank of America (BofA) note the situation in China, S. Korea, and Singapore, all of which are key end markets and manufacturing centers for instrumentation companies, appears to be on the rebound. However, with the spread to Europe and the U.S., social distancing and stay-at-home orders have shuttered many academic and government labs across the regions, disrupted supply chains, and sharply reduced non-essential medical volumes. In general, there is hope for recouping delayed instrument orders in H2 2020. Consumable spending is down and the optimism for a fast rebound is not as evident. Notably, Qiagen and Sartorius (lab equipment) are up 18.7% and 23.5% YTD 2020, respectively. Qiagen announced acquisition by Thermo Fisher in March. Sartorius had a strong Q1 and is operating well, despite challenges.

Companies in the sensor and electronics T&M sector will be impacted more (or less) by the primary end markets they serve. Market commentary suggests more negative impacts to aerospace, automotive, energy, and industrial, while military/defense and server/IT datacom markets should see a more muted impact. Recent commentary from select T&M companies follows:

METTLER TOLEDO	April 13, 2020. Mettler-Toledo announced it is withdrawing FY 2020 guidance due to the virus. Guidance was provided on February 6, 2020. Mettler was one of the few companies that had incorporated the impacts of COVID-19 into its Q1 guidance. The company forecasts sales to be down 4.0% in Q1. Mettler also stated that Q1 EPS will be below the guidance provided in February.
Thermo Fisher	April 6, 2020. Thermo Fisher Scientific announced it is withdrawing FY 2020 guidance, which was provided on January 30, 2020. Per the press release, "As the pandemic spread from China to countries worldwide, the company saw a significant reduction in customer activity by late March. Given the ongoing uncertainty of the scope, duration and impact of the pandemic, Thermo Fisher is currently unable to reasonably estimate its annual financial performance."
	March 3 , 2020 . Thermo Fisher agreed to acquire Dutch diagnostics group, Qiagen, for \$11.5 billion. Thermo noted that buying the Dutch company would allow it to strengthen its portfolio, notably in testing for infectious diseases. Qiagen had been considering strategic alternatives in Q4 2019.
🔅 eurofins	April 3, 2020 . Eurofins Technologies launches multiple new products for the serologic detection of antibodies in patients who have been exposed to COVID-19. "Eurofins has been at the forefront of fighting SARS-CoV-2 in the U.S., launching proprietary, active infection testing through laboratories including Viracor Eurofins and Eurofins Diatherix using polymerase chain reaction (PCR) testing. Both laboratories have available capacity for additional PCR testing with same or next day results." <i>Eurofins Press Release</i> .
IN STRUMENTS	March 23, 2020 . Oxford Instruments provided a business update. "We have temporarily closed our Asylum and X-ray Technology sites in California. In line with local authority guidance, many of our regional offices are also temporarily closed at this time, including Concord, USA; Wiesbaden, Germany; Paris, France. We are pleased that our China facilities have reopened, although our sales and support teams have done an excellent job supporting our customers during their shut down."
TELEDYNE TECHNOLOGIES Everywhereyoulook	April 6, 2020. Teledyne Technologies commented on preliminary results for Q1 2020. "No company is immune to global economic challenges. However, Teledyne's business portfolio is exceptionally well-balanced across end markets and geographies, and includes a high degree of businesses serving critical infrastructure sectors such as the defense industrial base, water and wastewater, and healthcare and public health. Teledyne's management expects to achieve record first quarter sales and EPS. Sales are expected to increase over 5% in Q1. However, given likely reductions in customer capital expenditures, we currently expect a substantial change in demand in the second quarter for some of Teledyne's commercial businesses, especially those serving North America and Europe-based customers."
WISTRAS A World of NDT Solutions	March 25, 2020. Mistras Group announced full year and Q4 2019 results and provided an update on 2020 guidance. "The Company experienced a weakening Oil and Gas market coming into the fourth quarter of 2019, which was believed would continue into the first quarter of 2020. Additional macro concerns have since surfaced, most prominently the impact of COVID-19 coronavirus, while crude oil prices remain under intense pressure. Given the uncertainty at this time, the Company will not provide full year guidance. The Company expects revenue for first quarter of 2020 to be down sequentially from the fourth quarter of 2019 as well as from the first quarter of last year, by approximately mid-teens percentage."

TEST & MEASUREMENT SECTOR REVIEW

Strategic Profile: Danaher (NYSE:DHR)

Company Overview

- Danaher Corporation designs, manufactures and markets professional, medical, industrial and commercial products and services worldwide
- Danaher manufactures scientific instruments and consumables in three segments: life sciences, diagnostics, and environment and applied solutions
- significant Danaher executed value-enhancing strategic initiatives in 2019, as evidenced by the strong 2019 stock price performance \mathcal{O}

Select Transaction History

- December 2019 Envista (corporate split-off) announced the completion of split-off exchange offer of all the shares of the common stock belonging to its dental business spinout
- February 2019 Biopharma business of GE provides instruments, consumables, and software that support the research, discovery, process development and manufacturing workflows of biopharmaceutical drugs. \$21.4 billion purchase price; 17.0x EBITDA

TEST & MEASUREMENT SECTOR REVIEW

DSP Test & Measurement Industry Commentary

Recurring Revenue Remains a Strategic Priority in the T&M Industry

As we have written in past sector reviews, recurring revenue is top of mind for CEOs and Boards of Directors for public and private companies. Recurring revenue statistics are frequently highlighted in quarterly earnings reports and emphasized during investor presentations or on earnings calls.

The explosive growth of smart, connected equipment, instruments and products has given T&M companies countless ways to add value, recover greater profit, and unlock new recurring software, service and consumable-based revenue streams. Given the mission-critical nature of manufacturing operations in high-reliability industries, maintenance, service, and aftermarket parts are needed to avoid disruptive and costly system breakdowns. In addition, automation systems generate recurring software upgrades and subscription-based revenue. Software updates also improve system functionality and guard against new cybersecurity threats (a top concern of executives across industries).

Highly sophisticated, multi-billion dollar manufacturing operations are subject to ongoing rigorous health, safety and environmental compliance regulations. Downtime or system failure is not an option. T&M executives understand this dynamic and are constantly seeking new opportunities to increase the overall percentage of recurring revenue in their businesses to better serve their customers while also increasing the value of their enterprises. Select examples follow.

AMETEK. David Zapico commented on a 2019 earnings call regarding acquisitions made in 2017 and 2018, "Yes, we are mixing it up, and when we announced those deals, and we address the recurring revenue, you know Telular stands out. It is about two-thirds of the business that's recurring, but many of the businesses, like Spectro Scientific, were 30%, 40%, and so we're mixing up and the recurring baseline of AMETEK, it was about 20%, but our recent acquisitions have been a bit more than that."

Fortive. In September of 2019, Fortive announced its intention to separate the company into two independent, publicly traded companies. The transaction, when completed, will create:

- An industrial technology company with a differentiated portfolio of growth-oriented businesses that generates significant recurring revenue, highly attractive margins, and strong free cash flow. This company will retain the Fortive name.
- A global industrial company ("Vontier") focused on the growth opportunities in the rapidly evolving transportation and mobility markets.

Fortive will be an industrial technology company with a portfolio of businesses that are aligned with significant long-term growth trends driven by the shift towards software-enabled workflows, the importance of connected devices, rising productivity, safety, and security requirements, and the demand for high-quality healthcare globally. A strong mix of recurring revenue will be a highlight of the "new" Fortive.

Keysight Technologies. Keysight has been moving from a hardware-centric products company to a software-centric solutions company. Ron Nersesian, Chairman and CEO, stated on Q1 2020 earnings call, "We continue to shift our portfolio to more and more subscription services over time so we could see more recurring revenue. And we're working on increasing our annual recurring revenue (ARR), and that's not an instantaneous change but we're very pleased with the direction that we're taking."

KLA Corporation. Rick Wallace, CEO of KLA commented on Q2 FY 2020 earnings call, "KLA's service business continues to deliver excellent revenue growth performance, while simultaneously generating strong free cash flow. Semiprocess control service revenue reached \$1.1 billion in 2019 with 70% of this revenue generated from subscription-like service contracts. This performance continues to give us high levels of confidence that KLA services can deliver long-term revenue growth rates in the range of 9% to 11%. Several factors drive growth in our services business, including increased complexity of our systems, expansion of the installed base and expanded demand at the trailing edge nodes with high utilization at foundry and logic."

Roper Technologies. Neil Hunn, President and CEO, commenting on M&A. "Valuations remain robust in the private markets. But the assets that we will all come to -- I think you'll all come to appreciate that we look for, the niche orientation, the high retention rates, the mid to high single digit growth, the general non-cyclicality, high recurring revenues, those assets and high cash flow, low to limited capex, those command a higher price."

Thermo Fisher Scientific. Marc Casper, President and CEO commented at a conference in Q1 2020, "When you look at our revenue profile in terms of orientation, as a \$25 billion revenue company, we have a really strong set of end markets, pharmaceutical and biotech being the largest, representing about 40% of our revenue, but we also serve the healthcare and diagnostics market, academic and government, and industrial and applied. About 75% of our revenue is recurring in nature through our services and consumables products.
